## **Responsive Technical Assistance**

Responsive technical assistance is a comprehensive, rapid-response program designed to address urgent grid infrastructure challenges in the United States.

Need Rapid-response technical assistance?

**[Apply here.](#)**

## **Technical Assistance for Digital Assurance**

Technical assistance for digital assurance is ensuring digital capabilities of the grid, modernizing procurement to embed cybersecurity and risk mitigation, and establishing a cybersecurity baseline for critical equipment.

Need help with digital assurance?

**[Apply here.](#)**

## **Technical Assistance for Damage Prediction and Resilience**

A unified platform that integrates Department of Energy-funded tools and commercial capabilities into a single interface for utilities, enhancing asset reliability and grid capacity while mitigating hazards and weather extremes.

Need technical assistance for damage prediction and resilience?
